

Seismic In Motion for Students – October 2, 3, and 4, 2007

The CSEG Outreach committee is extremely grateful for the support of our corporate sponsors for *Seismic in Motion for Students*. Students from Sir Winston Churchill, Forest Lawn and Centennial High Schools enjoyed a day of seismic field activities organized by the CAGC. Outreach volunteers visited the schools before the field trip and informed students about careers in geophysics, either through university education to a career as a geophysicist, technical school training to be a geophysical technologist or direct entry into seismic field operations.

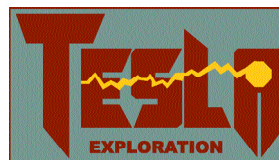

Outreach volunteers also guided the students during the field trip as they visited the various field stations. The students reported a high degree of satisfaction with their outing and the CBE is delighted by this significant partnership between the energy industry and Career Pathways. Thanks to volunteer speakers and guides Helen Isaac, Perry Kotkas, Annette Milbradt, Mark Lane, Petra Buziak, Pratt Barndollar, and Anne Halladay.
