

## Seismic in Motion for Students 2009

CSEG Outreach was again pleased to host students from three Calgary high schools to Seismic in Motion for Students (SIMfS), which was held in October. The students saw all aspects of seismic field acquisition as part of the CAGC's annual Seismic in Motion, where companies showcase their seismic acquisition technologies and procedures. Students and staff from John G. Diefenbaker HS, Forest Lawn HS and Centennial HS appreciated the careers displays and enjoyed the day out in the field. Students from the University of Calgary, Mount Royal University and SAIT were also guided around the exhibits.

CSEG Outreachers Annette Milbradt, Helen Isaac and Hassan Odhwani gave presentations to the high school students prior to the field trip. CSEG Outreachers Annette Milbradt, Helen Isaac, Kathryn Welsh, Cathy Martin, Bob Parker, and Jeff Gautreau were guides for the high school and post-secondary students during the three days of field trips. Perry Kotkas presented careers information to the students. *R*

Students watch vibroseis operations.

A dynamite shot ends the field trip.

**THANK YOU VERY MUCH TO OUR  
CORPORATE SPONSORS OF SEISMIC IN MOTION FOR STUDENTS!**
